SUMMARY

Full Stack Developer with 4+ years of experience building scalable, high-performance web applications using React.js, Next.js, Node.js, JavaScript, TypeScript, MongoDB, and SQL. Experienced in developing enterprise solutions for the telecommunications and healthcare industries with expertise in interactive data visualization, real-time communication, REST API integration, and responsive user interface development. Passionate about creating intuitive user experiences, writing clean and maintainable code, and solving complex technical challenges.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, D3.js, Material UI, React Native, Victory Native

Backend: Node.js, Express.js, REST API, GraphQL, Socket.io

Database: MongoDB, SQL

Cloud and Services: AWS, Twilio

Tools: Git, GitHub, Postman, VS Code

WORK HISTORY

Teqfocus Solutions Pvt Ltd.

Mar 2022 - Present

Software Engineer

Pune

Achievements: Customer Excellence Award (Recognized for exceptional contributions to client projects and consistently delivering high-quality software solutions.)

PROJECTS

Sales Engineering Tool (Client Project)

Feb 2024 - Present

Domain: Telecommunications

Tech Stack: React.js, Next.js, D3.js, Node.js, Tailwind CSS, Python

Description : Developing an enterprise network planning platform that enables network engineers to calculate service availability and optimal routes between locations by visualizing both logical network and physical network. The application reduces a manual analysis process that previously took 1–2 days to approximately 1–2 minutes.

Key Contributions:

- Develop responsive and scalable user interfaces using React.js, Next.js, and Tailwind CSS.
- Design and implement complex D3.js visualizations to display network consisting of 500+ interconnected nodes and links for both logical network and physical network rendering from KML data.
- Build interactive features including network exploration, route visualization, zooming, panning, node interactions, and link interactions.
- Optimize rendering performance for large KML datasets and complex network visualizations.
- Integrate REST APIs and Collaborate with cross-functional teams to deliver high-quality features on schedule.

Vibrant Energy App (Client Project)

Aug 2023 - Jan 2024

Domain: Energy

Tech Stack: React.js, React Native, Node.js, Victory Native, Tailwind CSS.

Description : Developed a customer-facing mobile application that provides access to energy-related information, including agreements, bills, generation data, and interactive dashboards. The application enables customers to monitor and analyze their data through day-wise, monthly, and yearly visualizations.

Key Contributions:

- Developed responsive mobile interfaces using React Native and Tailwind CSS.
- Built dashboards with interactive charts to visualize energy generation and consumption data across multiple time periods.
- Developed features for viewing agreements, bills, and other customer documents.
- Integrated REST APIs for authentication, dashboards, and customer data.

YourPath Healthcare (Client Project)

Apr 2022 - May 2023

Domain: Healthcare

Tech Stack: React.js, Next.js, Node.js, Express.js, MongoDB, AWS (Cognito, SES, S3, EC2, Lambda, IAM), Twilio, REST APIs.

Description : Developed a healthcare platform designed to support individuals with substance use disorders by connecting patients with healthcare professionals through digital communication and care management. The platform enables patients to complete assessments, communicate with counselors via chat, schedule appointments, and receive notifications through Twilio..

Key Contributions:

- Developed responsive web applications using React.js, Next.js, and modern UI practices.
- Built backend APIs using Node.js, Express.js, and MongoDB.
- Implemented authentication and user management using AWS Cognito.
- Integrated Twilio for SMS notifications, chat, and email communication workflows.
- Collaborated with cross-functional teams to deliver new features, resolve production issues, and improve application performance.

Teqintel

May 2023 - Sep 2023

Domain: Healthcare

Tech Stack: React.js, React Native, Node.js, REST APIs

Description: Developed web and mobile applications for healthcare operations, enabling managers to assign doctors to medical representatives (MRs), track field visits, manage orders, and monitor inventory updates.

Key Contributions:

- Developed responsive user interfaces using React.js and React Native.
- Integrated REST APIs.

Teqidp

Aug 2023 - Sep 2023

Domain: Intelligent Document Processing (IDP)

Tech Stack: React Native

Description: Developed a mobile application for intelligent document processing that enables users to extract text and tabular data from images and PDF documents.

Key Contributions:

- Developed responsive mobile user interfaces using React Native based on Figma designs.
- Integrated REST APIs to support document processing and data extraction workflows.

PERSONAL PROJECTS

Real-Time Chat Application

Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, Socket.io, WebSockets, JWT, Tailwind CSS

Description: Designed and developed a full-stack real-time chat application that enables secure one-to-one communication with live messaging and user presence.

Key Contributions:

- Developed secure user authentication using JWT, including user registration and login
- Built REST APIs using Node.js, Express.js, and MongoDB for user and chat management.
- Implemented real-time one-to-one messaging using Socket.io and WebSockets.
- Developed features including online/offline presence, typing indicators, message delivery, and read receipts.
- Designed responsive user interfaces using Next.js and Tailwind CSS.
- Currently implementing video calling to extend real-time communication capabilities.

EDUCATION

AIKTC (Affiliated to University of Mumbai)

2019

Bachelor of Engineering, CGPI:8.24

Electrical Engineering
